

## Installation and Configuration of the ClearCube Solution

### COURSE AUDIENCE

This course is designed for our partner System Architects and Systems Engineers.

### COURSE PREREQUISITES

It is recommended that students have experience administering Windows desktop environments. Windows Server experience is not required to attend and complete this course, but basic knowledge is helpful.

### CERTIFICATION EXAM

At the end of the course, students will have the opportunity to take the ClearCube Certified System Engineer Level I exam.

### PRODUCTS INCLUDED

I8020, I8820, I9420,  
C7420 Thin Clients  
Sentral™

Course SKU: G0990001

### Course Overview

Installation and Configuration provides hands on training with the entire ClearCube hardware solution and Sentral™ management software. During the course, students will install and configure the complete hardware solution from desktop to data center. Students will then install and configure the Sentral™ software to take advantage of its specialized hardware management capabilities. This will allow students to explore and manage the entire solution, from the user to administrator experience.

This is an instructor-led course with classroom based lecture and hands on student labs. This course lasts 5 days and is provided in convenient locations around the United States and Europe. In some countries, this course can also be provided onsite for multiple students without needing your employees to travel.

### Course Outline

#### Installation of Sentral™

- Requirements
- Installation
- Configuration/settings

#### C/Port Solution

- Overview
- Requirements
- Physical Installation
- Administration in Sentral

#### Thin Client Solution

- Overview
- Requirements
- Physical Installation
- Administration in Sentral

#### PC-over-IP Solution

- Overview
- Requirements
- Physical Installation
- Administration in Sentral

#### Self-Paced Lab

- Complete ground-up installation including hardware and software configuration
