

ClearCube Installation Package

A Component of the CompleteStart™ Professional Services Program

CompleteStart Overview

The benefits of a ClearCube environment are significant, but getting the most out of your investment requires commitment and dedication. Careful planning, preparation and execution are the keys to a successful implementation. Fortunately, ClearCube is with you from start to finish. Designed to make the ClearCube implementation painless for the IT staff and transparent to the user, CompleteStart is a comprehensive program covering three vital areas: pre-installation readiness, training and installation.

Package Overview

Whether it is 10,000 seats or only 10 - ClearCube System Engineers have the knowledge and skills to help you install your equipment and management software correctly and efficiently. In addition, System Engineers will help streamline IT staff tasks and make your user transition virtually seamless. You will have confidence and peace of mind knowing your ClearCube equipment and software has been properly deployed and is ready for years of reliable service.

Package Highlights

A certified ClearCube System Engineer will visit your site and work with your personnel to install your equipment and software covering the following areas:

- Installation of ClearCube hardware including Blades, Cages, BackPacks, User Ports and Fiber Transceivers as needed.
- Configuration of appropriate hot sparing schemes.
- Implementation of disaster recovery plans and methodologies.
- Configuration of secure hardware and software administration methods.
- Implementation of network configurations that achieve optimal PC Blade manageability.
- Installation of ClearCube Management Suite (CMS) Software including security configurations.
- Verification of CMS functionality including monitoring, administration, supervision, rebooting and Blade switching/sparing.
- Building and deploying operating system images for each department or organizational group.
