

## Sentral Administration - Virtual Lab

### COURSE AUDIENCE

This course is designed for IT professionals, Systems Engineers and Help Tech/Support technicians.

### COURSE PREREQUISITES

It is recommended that students have experience administering Windows desktop environments. Windows Server experience is not required to attend and complete this course, but basic knowledge is helpful.

### CERTIFICATION EXAM

At the end of the course, students will have the opportunity to take the Sentral Administration exam, which is preparation for the ClearCube Certified Systems Engineer Level I Certification Exam.

### PRODUCTS INCLUDED

Sentral™

### Course Overview

The Sentral Administration Virtual Lab provides web-based hands on training on the ClearCube Sentral™ Management Software. During the course, students will install and configure Sentral™ from the ground up. This will allow students to gain experience with the software in a virtual “sandbox” before installation in a production network

The Sentral™ Administration Virtual Lab is a self-paced eLearning environment designed to deliver much more than content over the internet. Our virtual lab is designed to meet the needs of our students who need to quickly learn about the Sentral™ solution. The course is a 40-hour online course and all that is needed to attend is a browser and connection to the Internet.

### Course Outline

#### Installation of Sentral

- Install MySQL
- Install Sentral
- Configuration Wizard

#### Device Setup

- Device Discovery
- Group Creation

#### Administration Features

- Managing Views
- Managing Reports
- Managing Alerts

#### Connection Brokering
