

ClearCube Technology - User Port Certified Peripherals List

ClearCube Technology has certified the following peripherals for use with ClearCube C/Ports and I/Ports. For information regarding devices not on this list, or to inquire about certification of a peripheral device, contact your sales representative directly or call ClearCube Support at (866) 652-3400. ClearCube's legacy peripherals lists are included at the end of this document for reference on EOL products and discontinued peripherals.

Legacy User Port Certified Peripheral Lists

ClearCube Technology certified the following peripherals for use with ClearCube C/Ports and I/Ports. The information listed below is considered legacy as most of the peripherals listed have been discontinued by the manufacturers and/or the ClearCube products have been EOL'd. This list was last updated 7/7/08.

C/Ports

ClearCube C/Ports are 100% compatible with the USB 1.1 specification. Not all peripheral manufacturers strictly adhere to the USB specification, and on rare occasions this can lead to device compatibility issues. For a trouble-free implementation and the best user experience, ClearCube strongly recommends purchasing C/Port peripherals from the certified list below.

Manufacturer	Model	Manufacturer	Model
PS/2 Keyboards			
Acer	6511-KW	Micro Innovations	KB-2961

I/Ports

ClearCube I/Ports rely on Microsoft's RDP technology for connectivity to ClearCube PC Blades. RDP includes built-in USB redirection capability for the following types of peripherals: USB mass storage devices (disk-on-keys, CD-ROMs, external hard drives, etc.), printers, serial port devices and USB smart card readers. Because not all manufacturers strictly adhere to the USB specification, some devices are not capable of being redirected by RDP. For a trouble-free implementation and the best user experience, ClearCube strongly recommends purchasing I/Port peripherals from the certified list below.

I8820 & I8020 Certified Peripherals
