

Topic: Turning Off PXE Services on the DHCP Machine
Component(s) Affected: PowerQuest ControlCenter
Date: June 06, 2003

OVERVIEW / ENVIRONMENT

If the DHCP service currently provides PXE services, and PowerQuest ControlCenter ST's PXE Server is preferred to control PXE client machines, the DHCP's PXE services can be removed. To do this, follow these steps:

Windows 2000

Using Microsoft's DHCP service on Windows 2000, modify DHCP with these `netsh` commands from a command prompt:

```
netsh.exe dhcp server delete optionvalue 60
netsh.exe dhcp server delete optionvalue 43
netsh.exe dhcp server delete optiondef 60
netsh.exe dhcp server delete optiondef 43
```

Windows NT 4.0 (Service Pack 6a)

Using Microsoft's DHCP service on Windows NT 4, or with non-Microsoft DHCP services, refer to that service's documentation for instructions to complete the following tasks:

- Remove DHCP option 60
- Remove DHCP option 43
