

**Topic:** R1200 POST Information not Supported  
**Component(s) Affected:** R1200 Blade PC  
**Date:** March 8, 2004

---

## OVERVIEW / ENVIRONMENT

---

When the initial ClearCube splash screen on an R1200 is bypassed, the summary screen appears corrupted.

---

## DETAILED DESCRIPTION

---

While the R1200 Blade is powering up and the "Press F2..." message appears in bottom left corner of the initial splash screen, some users may attempt to press the Escape key to view Power-On Self-Test (POST) information. This feature is not supported on the R1200. Pressing the Escape key results in a corrupted version of the splash screen. However, the Blade continues its normal startup.

---

## RESOLUTION

---

On previous Blade PC models, pressing the Escape key during startup displayed POST information. This feature is not supported on the R1200 and is not an option at the splash screen.
