

Topic: Cumulative List of Updates for I8800 I/Ports
Component(s) Affected: I8800 I/Ports, XPe
Date: September 1, 2005

OVERVIEW / ENVIRONMENT

ClearCube has developed a number of update files for I8800 I/Ports running the XPe operating system. This Technical Bulletin lists those updates and provides general installation instructions. Users can download these updates from the ClearCube support website at <http://support.clearcube.com/>.

DETAILED DESCRIPTION

The Technical Bulletin listed for each update provides more detailed information on the update and its installation. For a summary of Microsoft security updates for I8800 I/Ports, please see *Technical Bulletin TB0096, Summary of I8800 I/Port Security Updates*.

Note: These updates apply to the I8800 I/Port XPe only. Do not attempt to install them on other devices.

Technical Bulletin	Update Description	Update Filename
<i>TB0081, Updating an I8800 I/Port</i>	Provides additional WMI support for Grid Center 4.0	GC1759b-121304.zip
<i>TB0083, I8800 I/Ports Require Update for Grid Center 4.1</i>	Informational notice included in I/Port carton	See <i>TB0084</i>
<i>TB0084, I8800 I/Ports Require WMI Update for Grid Center 4.1</i>	Provides additional WMI support and updated Grid Center Client application for Grid Center 4.1	WMI-UPDATE.zip
<i>TB0087, I8800 I/Port Update: Printer Redirection</i>	Provides support to allow connecting I8800 I/Ports to USB printers	RdpConnect.zip
<i>TB0093, I8800 I/Port Update: Sasser Virus Scanner</i>	Provides a scanner/remover for the Sasser virus	Sasser_update.zip
<i>TB0094, I8800 I/Port Update: Berbew Virus Scanner</i>	Provides a scanner/remover for the Berbew virus	Bebew_update.zip
<i>TB0110, I/Port I8800 Update: Microsoft Internet Connection Firewall</i>	Provides the Microsoft Internet Connection Firewall (ICF) to provide baseline protection against intrusion	Iport_firewall.zip

Two sets of files are provided for each I8800 I/Port update:

- The local installer, in a folder named **Stand Alone**.
- The Grid Center remote installer, in a folder named **GC Push**.

The local installer is an executable file that is run by physically carrying the file to the I8800 I/Port on a Mass Storage Device such as a key drive, and then executing it.

The Grid Center remote installer is run from the Grid Center Console, in the Update View, and can be applied to multiple I8800 I/Ports or I/Port groups simultaneously.

The following procedures provide a high-level description of the tasks needed to install an update. For detailed information and instructions, consult the appropriate Technical Bulletin.

To apply update locally, do the following:

1. Log in to the I/Port as administrator.
2. Disable the write filter.
3. Copy the update installer file to the I/Port.
4. Double-click the installer file. The update installs automatically and reboots the I/Port.

Note: Do not press any keys during the update. Allow it to run undisturbed.

5. Delete the installer file from the I/Port and re-enable the Write Filter.

To apply the update remotely using Grid Center, do the following:

1. Load the update file onto a volume accessible by the Grid Center Console.
2. Start Grid Center (if it is not already running).
3. From the Update View in Grid Center, select an individual I/Port or an I/Port Group to update.
4. Specify the path and name of the Update and Answer files, including the file extension (you can browse for these files), and press the **Update** button.
