

**Topic:** I/Port I8800: Microsoft Security Update MS05-049  
**Component(s) Affected:** I/Port I8800  
**Date:** November 7, 2005

---

## OVERVIEW / ENVIRONMENT

---

ClearCube has provided a new I/Port update file to improve security on the I8800 I/Port. This update comprises Microsoft Security Update MS05-049 for Windows XPe as it applies to ClearCube I8800 I/Port devices. MS05-049 replaces MS05-016, discussed in *Technical Bulletin TB1027*.

Microsoft Security Update MS05-049 is rated by Microsoft as an important update. It is available on the ClearCube Technology Support website as `MS05-049_XPe_CCT.zip`.

For a summary of Microsoft security updates for I8800 I/Ports, please see *Technical Bulletin TB0096JS, Summary of I8800 I/Port Security Updates*. For a summary of other updates for Eon e100 I/Ports, please see *Technical Bulletin TB0161JS, Cumulative List of Updates for I8800 I/Ports*.

**Note:** This update applies to the I8800 I/Port only. Do not attempt to install this on other devices. For Eon e100 I/Ports, this update is included in the `E100_XPe_October_2005_Hotfix_Snap-in.zip` file on the ClearCube Technology Support website. See *Technical Bulletin TB0172JS, Eon e100 XPe Update: Microsoft Security Update – October 2005* for more information.

---

## DETAILED DESCRIPTION

---

These vulnerabilities are addressed in MS05-049:

<http://www.microsoft.com/technet/Security/bulletin/ms05-049.mspx>

<http://www.cve.mitre.org/cgi-bin/cvename.cgi?name=CAN-2005-2117>

<http://www.cve.mitre.org/cgi-bin/cvename.cgi?name=CAN-2005-2118>

<http://www.cve.mitre.org/cgi-bin/cvename.cgi?name=CAN-2005-2122>

<http://www.us-cert.gov/cas/techalerts/TA05-284A.html> — Multiple vulnerabilities in the Windows Shell could allow remote code execution. If a user is logged on with administrative user rights, an attacker who successfully exploited this vulnerability could take complete control of an affected system, and then install programs; view, change, or delete data; or create new accounts with full user rights. However, user interaction is required to exploit this vulnerability. For a more detailed description of the issues described in TA05-284A, please see *Technical Bulletin TB0171: I/Port I8800: Microsoft Security Update MS05-052*.

---

## RESOLUTION

---

To reduce the threat of these vulnerabilities, install this security update.

This update is provided in a zipped file is available on the ClearCube Technology Support website as `MS05-049_XPe_CCT.zip` containing this Technical Bulletin and these files:

- The local installer, in a folder named **Stand Alone**.
  - A batch file named `Update.bat`
  - A folder named `I/PORT-CLIENT`

- The Grid Center remote installer, in a folder named **GCUpdate**.
  - A batch file named `updateGC.bat`
  - A zipped folder named `I/PORT-CLIENT.zip`

The local installer is an executable file that is run by physically carrying the file to the I/Port on a Mass Storage Device such as a key drive, and then executing it.

The Grid Center remote installer is run from the Grid Center Console, in the Update View, and can be applied to multiple I/Ports or I/Port groups simultaneously.

---

## INSTALLING UPDATE LOCALLY

---

To install an update locally, do the following:

1. Load the update file onto a Mass Storage Device (MSD) such as a key drive.
2. At the I/Port, log in as administrator. Press and hold the Shift key and select **Logoff** from the Start menu. Keep the Shift key depressed until the Administrator Login dialog box is displayed. The factory default Administrator account is `administrator` and the default password is `clearcube`. These can be changed in the User Accounts control panel.
3. Insert the USB storage device into an available USB port.
4. Browse to the folder on the storage device that contains the update file.
5. Double-click the `Update.bat` file. The update installs automatically and reboots the I/Port.

**Note:** Do not press any keys during the update. Allow it to run undisturbed.

---

## INSTALLING UPDATE REMOTELY USING GRID CENTER

---

To install an update remotely with Grid Center, do the following:

1. Load the update files onto a volume accessible by the Grid Center Console.
2. Start Grid Center (if it is not already running).
3. From the Update View, select an individual I/Port or an I/Port Group to update.
4. In the I/Port Update View dialog box, enter the path and name of the `I/PORT-CLIENT.zip` file (you can browse for this).
5. Enter the path and name of the `updateGC.bat` file (you can browse for this).
6. Press the **Update** button.
7. A dialog box confirming the successful update is displayed when the update is complete. If any I/Ports did not update successfully, a dialog box containing the names of these I/Port is displayed. Write these names down and deploy the update to these I/Ports individually.
8. If an I/Port cannot be successfully updated via Grid Center, attempt to update the I/Port locally (using the first procedure) before contacting ClearCube technical support.
