

ClearCube PCoIP-based Solutions

ClearCube® workstations, blades, zero clients, and thin clients provide industry-leading performance and security – and now support the new Teradici® All Access plans. Teradici All Access plans ensure you have the latest support for your PCoIP technology solutions by providing the software, resources, and cloud-ready options to help you manage, optimize, and future-proof your ClearCube deployments.

ClearCube Zero Clients include – Free one-year Desktop Access license.

Teradici All Access Plans

Teradici® All Access plans are a complete set of remoting solutions for knowledge workers and power users across a wide range of vertical markets. Built on trusted PCoIP® technology, All Access delivers the highest security for accessing workloads and applications hosted in any private or public cloud. Compatible with ClearCube Zero Clients, Specialty Zero Clients and Blade PC Workstations, customers can count on Teradici to provide consistent, high-fidelity user experience across geographically dispersed teams, even for those using graphics-intensive applications.

Secure your data

The protocol transfers only image information in the form of pixels, so no business information ever leaves your cloud or data center.

Enable mobility and collaboration

Any PCoIP-enabled device – Windows or macOS desktop/laptop, iOS or Android tablet, Chromebook or PCoIP Zero Client – can become a conduit to a secure workstation.

Enhance performance

PCoIP technology is designed to deliver a high performance user experience for knowledge workers and power users using even the most graphics-intensive applications.

DESKTOP ACCESS

Desktop Access plan

The Teradici Desktop Access plan includes all the elements administrators need to efficiently manage and maintain their PCoIP Zero Client deployment. Desktop Access includes licensing for PCoIP Management Console Enterprise - this combines an intuitive dashboard and operational metrics which enables IT administrators to easily manage, monitor and scale zero clients within their VMware Horizon or Amazon WorkSpaces deployment. Desktop Access also includes security and firmware updates for zero clients and 24 x 7 certified professional support from Teradici.

Cloud Access plan

The Teradici Cloud Access plan enables businesses to migrate non-GPU workloads and applications to a private or public cloud and securely access them from any PCoIP endpoint. The plan includes Cloud Access Software to visualize both Windows and Linux applications remotely, along with PCoIP Management Console Enterprise to monitor and manage PCoIP Zero Clients. Administrators will appreciate access to the latest software and firmware updates, as well as 24 x 7 certified professional support from Teradici.

CLOUD ACCESS

CLOUD ACCESS PLUS

Cloud Access Plus plan

The Teradici Cloud Access Plus plan enables businesses to migrate graphics-intensive workloads and applications to a private or public cloud. Get secure remote access and lossless visualizing of the most-demanding, graphics-intensive applications using any PCoIP® endpoint. The plan includes Cloud Access Software to visualize both Windows and Linux applications remotely, along with PCoIP Management Console Enterprise to monitor and manage PCoIP Zero Clients.

Workstation Access plan

With the Teradici Workstation Access plan, PCoIP Remote Workstation Card users get valuable feature updates and support when running high-fidelity, graphically-intensive applications. Workstation Access subscribers get new firmware features as they become available, 24 x 7 support from Teradici experts, and PCoIP Management Console Enterprise to monitor, manage, and scale both PCoIP Zero Clients and remote workstations as needed.
