Overview, Continued

Thin Client Architecture Overview

A thin client is a remote computing device that connects a user's monitors, keyboard, mouse, speakers, and other peripherals to remote PC blades (computers) and to virtual desktops (VMs). As shown below, computing resources are typically located in remote data centers.

Using a remote connection protocol, thin clients enable users to work on a blade or VM as if it is a local PC. See the documentation for the remote protocol application that you use for additional information.

Thin Client Setup

Safety and Precautions

- Do not install the thin client in areas where it can become wet or be exposed to water.
- Only use the power cord shipped with the thin client.
- Ensure there is four inches of space surrounding the thin client. Inadequate ventilation can damage the device.

Setting up a Thin Client

The steps below show how to set up a thin client.

Step	Action
1	Carefully unpack the thin client and components. Ensure that you have the following items: <ul style="list-style-type: none"> • Power cord and adapter (included) • USB mouse • USB keyboard • HDMI monitor, DVI monitor, or both
2	Connect a USB keyboard and mouse to the thin client.
3	Connect an Ethernet cable to the Ethernet port on the rear of the thin client and to the Ethernet port on the remote compute device or network device.
4	Optionally, connect any peripherals to the thin client.

Thin Client Setup, Continued

Setting up a Thin Client (continued)

Step	Action
5	Connect the included power cord and AC adapter, and then plug the adapter into the rear of the thin client. Continue by plugging the power cord into an AC power outlet.
6	Power on the thin client by pressing the power button on the upper portion of the front of the thin client.

You can now use remote connection software to connect to a remote computing device.

BIOS Hotkey

To access the BIOS, press the **ESC** key when prompted as the ClearCube splash screen appears.

User Accounts

The thin client includes the ClearCube Cloud Desktop OS.

Cloud Desktop OS:

The thin client boots to the user account and displays the Configuration Wizard the first time you power on the thin client. The default password is **admin** (case-sensitive).

NOTE: Change administrator password immediately after logging in. You can specify a new password using the Configuration Wizard.

Resources and Support

Additional Information

CD8801 User Guide shows how to configure, operate, and troubleshoot the CD8801 Thin Client.

Cloud Desktop OS Quick Start Guide shows how to configure, use, and deploy the Cloud Desktop operating system.

All product documentation is available from the ClearCube Support site (see address below).
